

Main tasks and directions of the activity of JSC “Almalyk MMC” are:

- Implementation of the unified technical policy in the field of expanding the mineral resource base and development of new deposits of ores of nonferrous and rare metals, aimed at ensuring the introduction of modern methods of organization of mining production, extraction of minerals and their further processing, the increase in the production of finished export-oriented products on the basis of deep processing of non-ferrous and rare metals;
- Further deepening of structural reforms, modernization and diversification of production to ensure high and stable growth of production, increase of export volumes of industrial products with high added value, including through the development of new markets, implementation of targeted work to reduce costs and improve product quality;
- Implementation of active investment policy to ensure stable investment attraction, including foreign, in the implementation of major investment projects involving construction and commissioning of new high-tech productions, creation of new workplaces, introduction of modern project management methods aimed at improving the efficiency and transparency of the processes of development and implementation of investment projects;
- Further deepening of processes of production localization, import substitution and saturation of the domestic market with necessary goods and components, expansion of inter-sector industrial cooperation based on the priority use of domestic products with the purpose of gradual reducing the import of certain goods and services;
- Organization of scientific-research works, including in the framework of the program for applied research in the field of non-ferrous, precious, rare metals and hard alloys, participation in the development and implementation of new technologies and innovative developments;
- The widespread introduction of modern information and communication technologies and software products, on that basis providing the increase management efficiency, reduce product’s costs and production costs, increase its competitiveness, as well as transparency of financial and economic activities of the complex;
- Strengthening of personnel potential of the complex, improvement of professional skill of technical and administrative personnel, organization of their training by strengthening cooperation with higher and secondary special, professional educational and scientific institutions, attracting young and talented specialists who are able to provide effective work in the industry in the conditions of fierce competition.

The purpose of the Company is making a profit. The Company also carries out its activities in the following purposes:

- Implementation of the state policy in the sphere of mining and metallurgical production;
- The expansion of markets and products export, ensuring the creation of portfolio of products and warranty sales;

- Wide attraction of investments, organization of joint ventures and enterprises together with advanced foreign firms and companies based on modern technologies and providing new competitive advantages;
- Development and implementation of the overall development strategy of all structural units in the composition of the Company;
- Development and implementation of scientific and technical policy and introduction of new progressive types of equipment and technologies;
- Diversification of production, development of products with higher processing level and added value;
- Reduction in the range of imported products on the basis of broader sectoral and cross-sectoral cooperation;
- The deepening of the localization of key production and reducing the imported parts in the production process;
- The main activity of the Company is organization of production on mining and processing of non-ferrous, precious, rare and other metals, production of refined copper, zinc metal, precious and rare metals and their alloys, sulfuric acid and other related intermediate products.

The subject of the Company’s activity also includes:

- The collection and processing of secondary resources and wastes containing non-ferrous and precious metals;
- Performing geological exploration of nonferrous metals and related minerals on the territory of the Republic, further exploration and operational exploration of precious metals deposits;
- Processing of raw materials coming from the enterprises of the Republic of Uzbekistan and entering on the terms of tolling;
- The implementation of research, development, design and survey and exploration works;
- Design, installation, commissioning and maintenance of automatic control systems of technological processes, systems of automatic fire alarm systems and video surveillance as well as data transmission networks;
- Repair and technical inspection of oxygen, nitrogen, argon, nitrogen, argon, carbon dioxide and propane cylinders;
- Transportation of goods and passengers by road and rail;
- Development, manufacture and supply of explosives and blasting agents;
- Blasting operations;

- Production of construction materials, structures and products, in particular, of construction and Portland cement;
- Organization of production and sale of different diameter copper pipes;
- Providing services in the field of storage and warehousing of materials, goods and products for production-technical purpose;
- Organization of public catering;
- Development of farms and cooperatives, promotion of development of collective gardening and horticulture;
- Maintenance and operation of communication systems, telephones and television, as well as the local computer systems;
- Repair, construction and installation, emergency works, works to ensure fire and radiation safety, including installation, putting into operation and maintenance of radioisotope equipment;
- Installation, adjustment and commissioning of the special technological lines and equipment, metal structures, measuring devices and machines in the mining and metallurgical industry, the implementation of sanitary-technical, electrical, insulation works and chemical protection, construction of industrial facilities, transport and engineering infrastructures;
- The implementation of the whole complex of construction, installation and special works by the way of "turnkey" within the framework of approved programs in the mining and metallurgical industry;
- The production of consumer goods, as well as apparel products and PPE;
- Manufacturing various products for industrial purposes, including cast non-standard equipment, spare parts and finished products;
- Implementation of wholesale and retail trade of wide range goods, creation of own network of wholesale, commercial, food, department stores and supermarkets;
- Provision of all types of household services to the population;
- Advertising activity, manufacture of advertising production according to customers' orders;
- Leasing and rent;
- Production and sale of thermal and electric energy;
- Implementation of capital mining operations;
- Providing housing and hospitality services;
- Production, preservation, storage, processing and realization of agricultural products;
- Manufacture and realization of manufactured products, works and services, as well as food products in the manner prescribed by law;

- Alerting the population through TV and print media on important events of the enterprise, city, region and republic;
- Implementation of foreign economic activity in accordance with the legislation of the Republic of Uzbekistan;
- Work organization of rest houses and recreation areas, health resorts, preschool educational institutions, children's health camps, parks of culture and recreation, amusement and other institutions providing social and cultural services to the population;
- Buying and selling machinery, technology and know-how in other industries in the country and abroad;
- Organization of exhibitions, auctions and other similar events on the territory of the republic and abroad and participation in them;
- Investment activity in the securities market;
- Training, retraining and advanced training at the expense of the Enterprise, as well as under the contract at the expense of individuals and legal entities;
- Conducting research and new developments in the field of production and processing of rare metals, active studying and introduction of advanced technologies on the use of products from rare metals, semi-finished products, alloys and other high-tech products;
- Development and industrial development of modern technologies for processing of rare metals by obtaining pure metals, alloys and composite powders specified by physical and chemical composition;
- Introduction of modern technologies for the production of tungsten and molybdenum deep processing of rare metals and production of products, carbide devices, chemical catalysts, composite materials and other products with high added value in demand on the domestic and foreign markets.
- Providing deep processing of rare metals, with the production of industrial semi-products and products in demand on the foreign markets, as well as processing semi-finished products of rare metals obtained from other enterprises of the republic;
- Production and sale of different diameter copper pipes;
- Engaging in other activities not prohibited by current legislation of the Republic of Uzbekistan and the relevant key directions, tasks and objectives stipulated in this Charter.
